

YOUNG PROFESSIONALS

“Dedicated to Excellence,
Committed to the Future”

BACKGROUND

CENIT@EA is a regional innovation hub that was initiated by the German Federal Ministry for Economic Cooperation and Development (BMZ) and the East African Community (EAC) and launched in 2019 to support East African Universities in providing the technical skills that meet the needs of the private sector, public sector and civil society stakeholders in the region's digital transformation. The Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) implements the project in cooperation with the Inter-University Council of East Africa (IUCEA), the German Academic Exchange Service (DAAD) and an academic consortium consisting of Nelson Mandela African Institution for Science and Technology (NM-AIST), the University of Oldenburg and other East African and German universities and institutions.

To cater towards the concrete needs of the digital transformation in East Africa, CENIT@EA established a market-driven Master in Embedded and Mobile Systems and offers short technical trainings for professionals in the area of Information and Communication Technologies (ICT), unemployed graduates and university lecturers to provide them with the relevant digital skills. To assure this demand driven and value creating approach, CENIT@EA works very closely with the private sector through events such as ICT4Business and cooperation mechanisms such as the Memorandum of Understanding with IBM. The regional network and dialogue between academia, public and private sector is furthermore facilitated for collaborative development of the digital transformation.

CENIT@EA is a regional innovation hub that offers a competitive Master in “Embedded and Mobile Systems” (EMoS) that follows a market-driven approach and includes practical elements, such as an internship, an applied Master thesis, Summer Schools and Guest Lecturers from the private sector, as well as Entrepreneurial and Soft Skills training.

This Digital Yearbook showcases the skills profiles of the Young Professionals of the 2nd cohort of the Master in Embedded and Mobile Systems. These Young Professionals have an excellent academic record and on average over three years of relevant work experience. They are motivated to develop digital solutions for the challenges the East African private and public sector are facing. Do not hesitate to directly contact the Young Professional if your company or organization is interested in offering an internship opportunity.
